

touchcare

Mobile health for mobile people

TouchCare lets patients do video appointments with their OWN doctors

We were built FOR the mobile generation BY the mobile generation

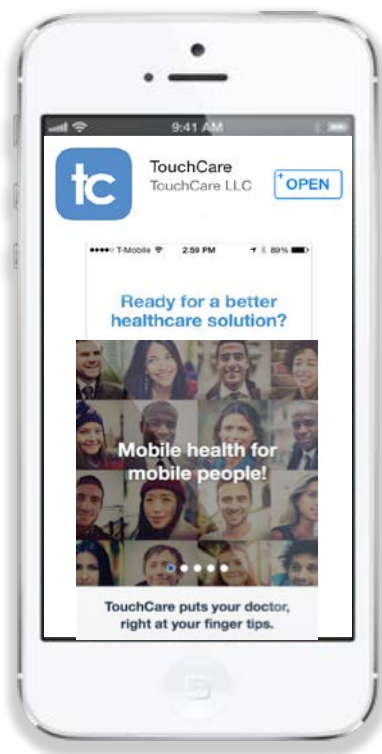

touchcare

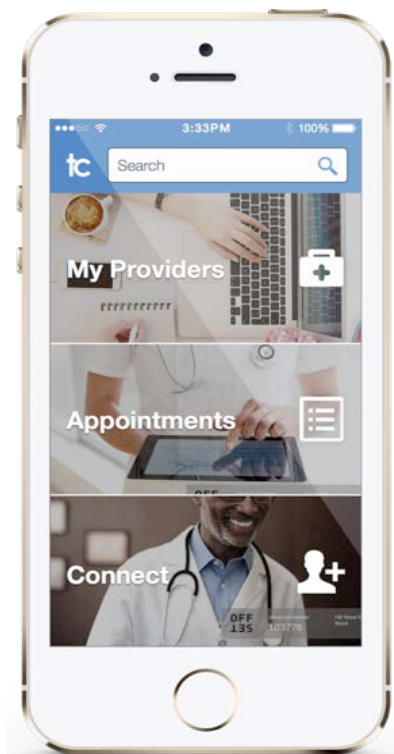

Getting started on TouchCare is easy

You or your doctor can be live in about 3 minutes

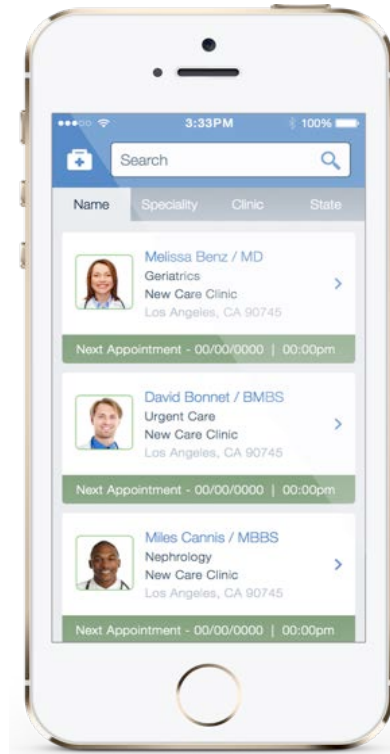

1. Download the App

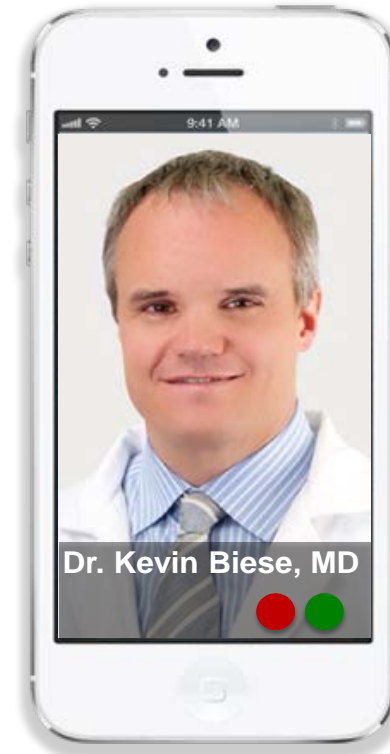

2. Create your profile

3. Connect with your provider

4. Talk

Meet Sam:

Sam has a range of health concerns. He wants to change his lifestyle and is seeking guidance.

What Sam **REALLY** needs is continuity of care from providers that have a relationship with him and know his health picture.

TC is a valuable tool to help Sam manage his busy life and his health

TouchCare makes it simple for Sam to interact with his own providers

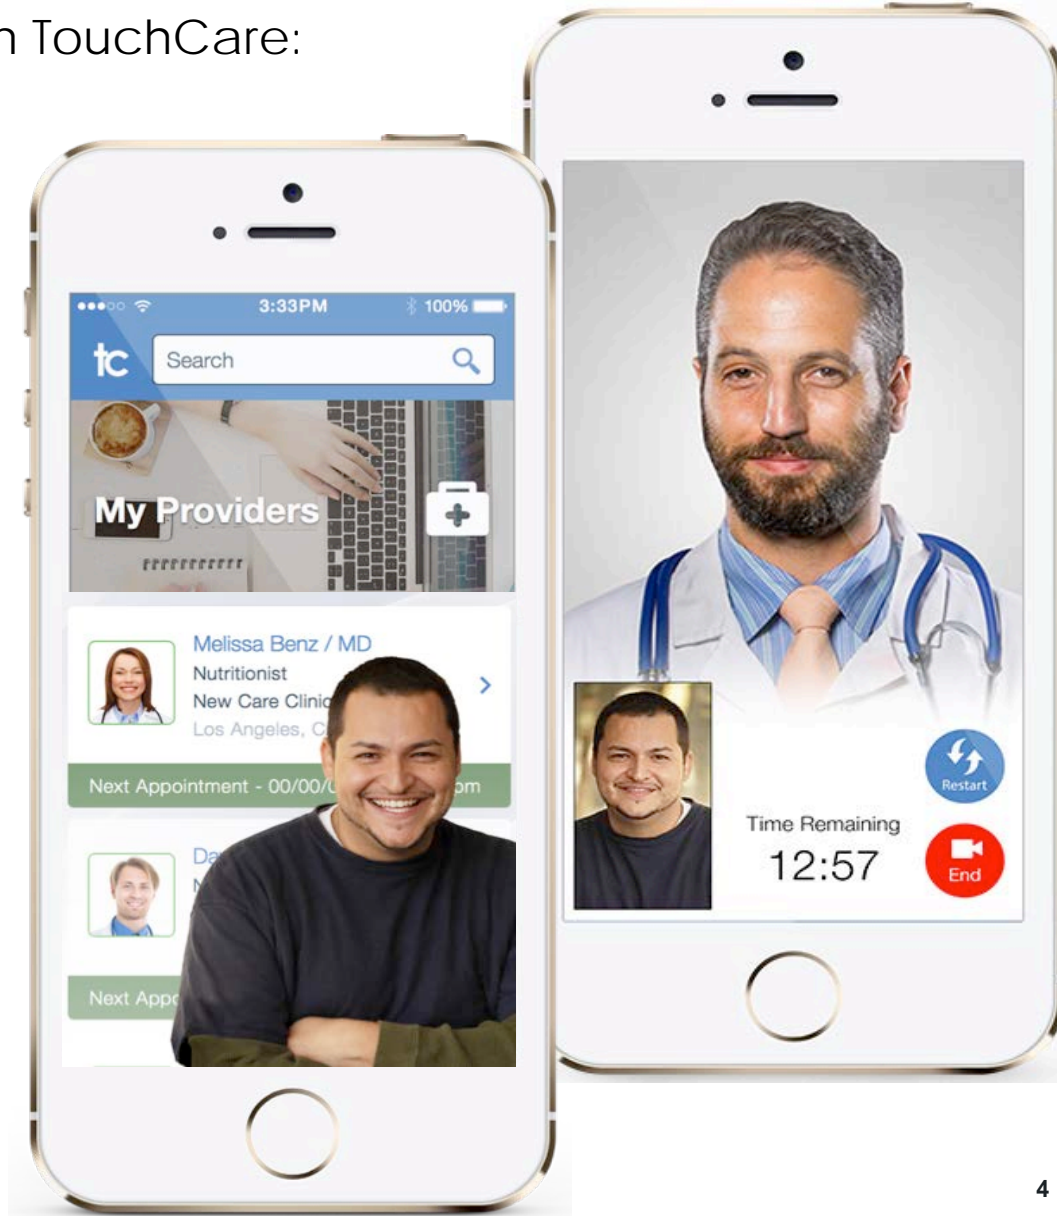

Sam keeps his own health network on TouchCare:

Primary Care Physician

Nutritionist

Cardiologist

He has the flexibility of seeing them in person or reaching them via TouchCare.

Sam and his family can use TouchCare for all their health needs

Sam uses TouchCare to connect with other providers...

Obstetricians

Gynecologists

Pediatricians

...to enhance the continuity of care for his whole family.

Simply. Easily.
